

# DLM Shells

DLM has recreated a whole new line of different types of sea shells. They are safe in aquariums and very useful in for education uses. This way we are not taking the shells from the wild. They can come unpainted or painted. These are just a few of our shells. Please refer to coralgroup2.pdf on the CD or Web site.

## Abalone

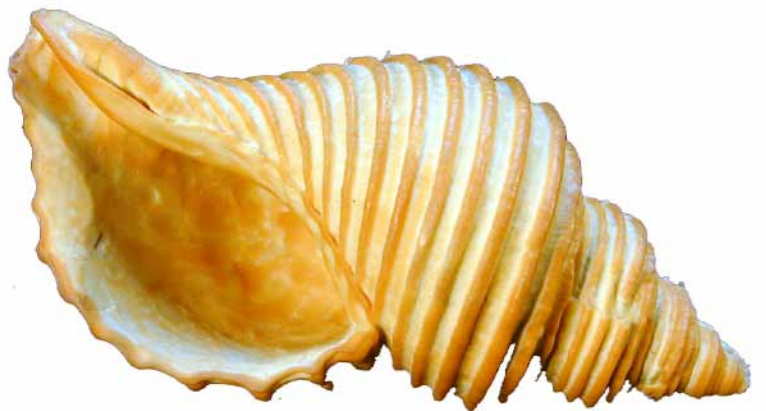

**Various Barnacles**

**Several Sizes of  
Sand Dollars**
